LETTER OF RECOMMENDATION

I have known Divya as her HoD and Project Guide in the Department of Computer Engineering. I have come to know her quite well, having interacted with her in consecutive semesters and it is with happiness that I note that she has chosen to continue her studies. She has had a highly impressive academic record and was awarded the best outgoing student in college. She has also shown her talent in fields like research, co-curricular activities, etc.

She is also curious and eager to learn concepts from the teacher. With respect to research, she has filed three patents and all the patents are published. This shows her innovation and zeal to acquire breakthroughs and her determination to acquire results is a promise to any industry she is associated with.

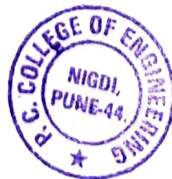

Divya has worked as ACM-W (Women) president and a student representative, also she is a good sportsman thus she possesses good leadership qualities. Apart from this she is self-motivated and has completed many technical courses and certifications to get state-of-art knowledge. Also, she is involved in community services through NSS activities, she is at the frontline to help society. Divya is aware of the importance of health and hence has completed a Diploma in Yoga. She is currently running Yoga classes (online) for many of her friends.

Divya, under my guidance, with her other two project partners worked on a project - "Identification of Indian Medicinal Leaves using Machine Learning." Her research interest is in Machine Learning. She has a remarkable capability to put ideas into practice. She is a well-read student and is always eager to learn.

She can communicate her ideas effectively and is a natural - initiator. She is helpful, friendly and maintains cordial relationships with her associates. Her creativity, independent thinking, desire to know more, and persevering efforts to go in-depth will help in her career of research, which she aspires for.

I am pleased to highly recommend Divya for graduate studies in your department. She is eminently suited and will surely project a very good image of Indian students.

Sincerely,
Dr. K Rajeswari
